New England Biolabs
Certificate of Analysis

Product Name: *Amylose Resin High Flow*
Catalog Number: *E8022S*
Packaging Lot Number: *10160897*
Expiration Date: *09/2024*
Storage Temperature: *4°C*
Specification Version: *PS-E8022S/L v2.0*

Amylose Resin High Flow Component List			
NEB Part Number	**Component Description**	**Lot Number**	**Individual QC Result**
E8022SVIAL	Amylose Resin High Flow	10114739	**Pass**

Assay Name/Specification	Lot # 10160897
Functional Binding Assay (Resin Binding Capacity) Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein (8 ml) was then passed through the column at 25°C, then washed with column buffer and the target protein eluted with ≥4 ml of column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg MBP5*-paramyosinΔSal /ml of resin based on A280 of the eluate.	**Pass**
Functional Binding Assay (Resin Binding Specificity) Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein (8 ml) was then passed through the column at 25°C, and then washed with column buffer. The target protein was eluted with ≥4 ml of column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20% Tris-Glycine gel confirms low non-specific binding of extract proteins and high isolation of target.	**Pass**

This product has been tested and shown to be in compliance with all specifications.
